Contents

Overview

This document consists in a tutorial to the Stata script for creating a stacked data matrix (hereinafter, SDM). The first part of the script is dedicated to

Data

Data can be downloaded through the following link: https://github.com/giucarny/StackMat/archive/refs/heads/master.zip. After clicking or browsing the link, a `.zip` folder named 'StackMat-master' will be automatically downloaded. Unzip it and browse it at your wish.

Briefly, the folder represents the copy of a public GitHub repository named 'StackMat'. The folder contains three main subdirectories:

- '**Data**': Contains the relevant datasets for the stacking procedure, in particular the dataset of the EES voter study of 2019;

- '**Scripts**': Contains the scripts for
